-   Python
-   JavaScript(Basic)
-   React(Basic)
-   Git
-   GitHub
-   Html
-   CSS
-   SCSS
-   Excel
-   Word
-   Figma
-   Canva
-   Premiere

Projects

Real Estate website (Work in progress)

-   Developed a full stack, fully responsive Real Estate website as a final year project in a team of two.
-   Focused on the frontend using React, React Router DOM, SCSS, and React's free navigation API, while my teammate handled the backend with Node.js, MongoDB, and Postman.
-   Features include user and seller account creation, home/room search by price range, post creation for sellers, and a chat section for communication between sellers and customers.
-   Demonstrated strong collaboration, technical skills, and project management throughout the development process.

Movie Explorer system

-   Developed a fully responsive Movie Explorer System as part of an internship project.
-   Implemented search functionality allowing users to search for movies and view details such as name, actors, IMDB rating, release date, and author.
-   Utilized React, React Styling Components, and integrated a free movie API, demonstrating proficiency in API integration.
-   Gained valuable experience in frontend development, UI/UX design, and working with external APIs during the project.
